

Modification Offerings Time Saving Options for your Washer

After-Sales Service

These days most businesses are running lean and therefore resources are at a premium. Ecoclean has several offerings aimed at saving your maintenance techs and operators time.

- ROLL UP ACCESS DOORS
- AUTOMATIC LOAD SYSTEM
- HMI VISUALIZATION UPGRADE

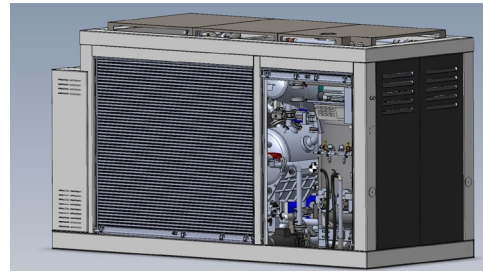

MODIFICATION

ROLL UP ACCESS DOORS

In some situations it is necessary to remove hinged access doors in order to provide your maintenance team more access to the internals of the machine. With roll up access doors you save the time of removing and re-installing doors during a machine maintenance. Not only do you save time, but you also save space as hinged access doors require up to a 39" swing radius.

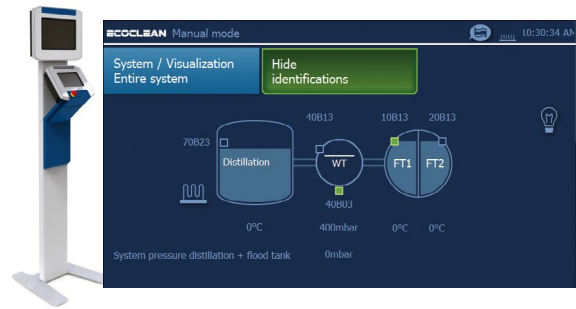

AUTOMATIC LOAD SYSTEM

If you have purchased machines with the manual loading option, but now need to increase throughput or are interested in reducing operator time loading/unloading your machine we can upgrade your system with our automatic loading conveyor. Along with the physical conveyor you will receive a software upgrade to seamlessly integrate the automatic loading system.

HMI VISUALIZATION UPDATE

Have more insight to the machine status by upgrading to the "Visualization" package. With this package you get the standard 7" HMI that displays all your automatic and manual functions plus a 12" HMI that provides more detailed insight into the status of the subsystems in your machine.
