

Training Offerings

After-Sales Service

With our training offering, we equip you with the knowledge to optimize the availability and cleanliness results of your cleaning machine.

WE OFFER THREE TRAINING PACKAGES:

- Operator
- Maintenance
- Advanced

By selecting different packages, you can work within your budget to increase the availability of the machine during normal production. We would welcome the opportunity to discuss these options with you.

OPERATOR TRAINING AGENDA (2 DAYS)*

- Review of machine functional specifications using the process schematic and operations manual
- Review of Operations manual content:
 - System filling
 - System heating
 - Manual functions
 - Distillation tank (if equipped): Normal operation mode, Concentration mode, Emptying after running concentration mode, Filling after concentration mode, Bringing machine to Base position after concentration
 - Emptying the filters
 - Emptying the machine
 - Review of machine options: Continuous oil discharge (if equipped), Cyclone separator (if equipped), AquaClean (if equipped)
 - Automatic operation mode
 - Bringing machine back to base mode (reset position) in automatic and manual modes
 - Shutdown procedure
 - Vacuum Pump oil change schedule

MAINTENANCE TRAINING AGENDA (2 DAYS)*

- Review of Operations manual content
 - Function and layout of HMI screen
 - Review of Machine parameters: Wash program menus, Service menus, Temperature settings, Pressure settings, Timers, Counters
 - Distillation tank (if equipped): Emptying after running concentration mode, Filling after concentration mode
 - Emptying the filters
 - Emptying the machine
 - Shutdown procedure
 - Vacuum Pump oil change schedule
- Trouble Shooting
 - Causes
 - Troubleshooting
- General Maintenance
 - Preventative safety measures
 - Service Intervals
 - Solvent sampling and PH/Chlorine value control check
 - Water separator control check
 - Navigation of Operator manual
 - Spare parts list

ADVANCED TRAINING AGENDA (4 DAYS)

- Operator training agenda + maintenance training agenda
- Process to change valve inserts

Please note that scope of work might change slightly to accommodate discrepancies due to different machines options. All training is informal in nature and will take place at the machine and will be based on the Operator Manual provided with the machine. No other training materials will be provided.

***Note:** *The machine should be in operation during this training and there might be interruptions during certain demonstrations. We request the machine not be used for normal production runs during this period.*

 **Ecoclean offers factory authorized Service & Parts to ensure your Ecoclean machine is running at peak efficiency. Please call today for a quote:**
